

# 2023 Hamadohri Presentation

~What should we do next?~

## **Futaba Group A**

Leul demile

Mukul Khandelwal

Saki Aramaki

Nurhafiza Mohamad Nor

Takumi Okamura

Fumina Yoshioka

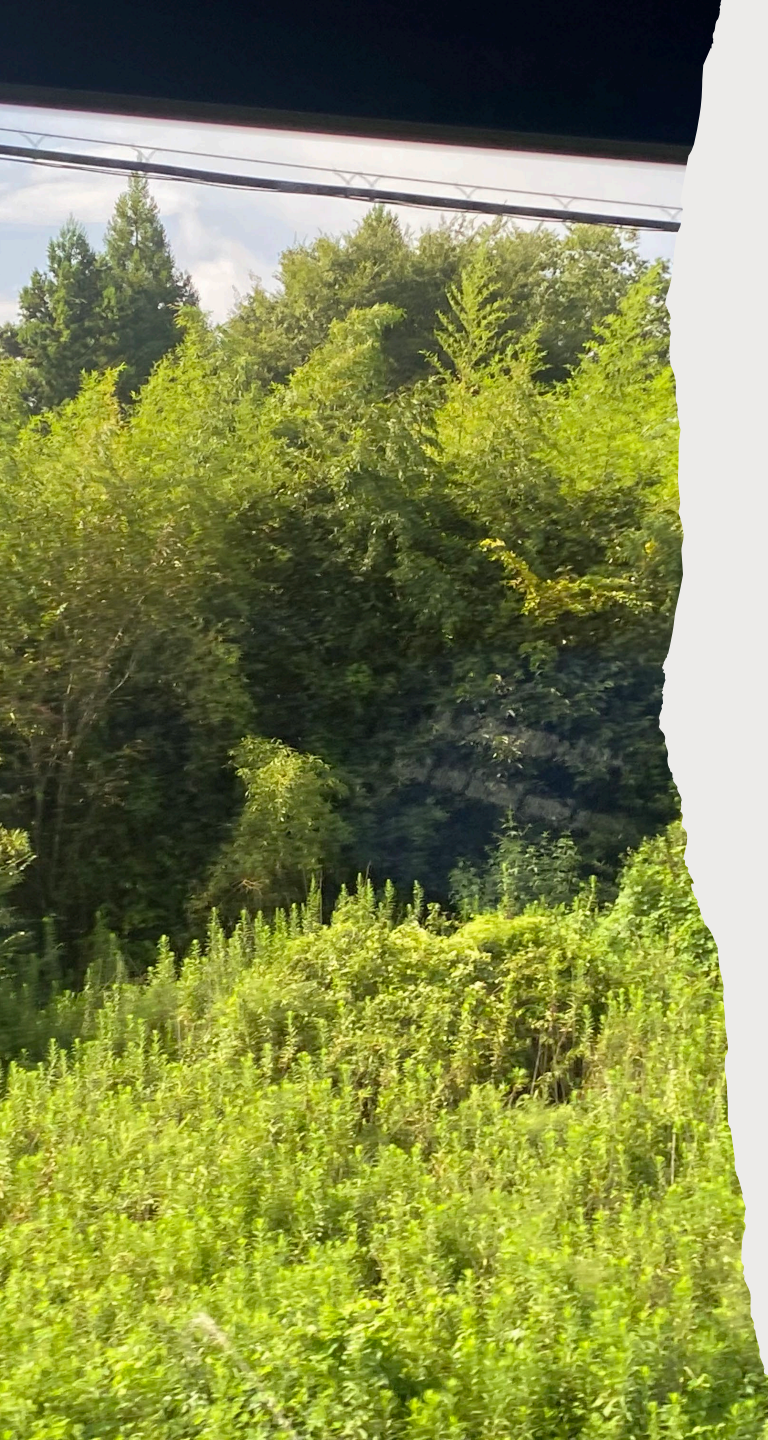

# 1F & Storage Facility tour

- Interim storage facility was larger than we thought!
- Treated water and Black sandbag
  - The amount is large
- The world should know about Japan and TEPCO's efforts in 12 years on :
  - decommissioning process
  - reconstructing of the affected area
- Where will the decontaminated soil go?
- We should reuse the soil or not?

# Sampling day

- How the rice field change in 12 years
- Theoretical knowledge was practically experienced

# Futaba Junior High School

- The condition is still the same even after 12 years
- Share experience with graduated student

# Local Sharing

- Local resident story
  - The person was living in hamadohri area
  - Evacuation story— one bag
  - Difficulties in contacting family
  - E-mail from 1F
  - Reality is different from movie

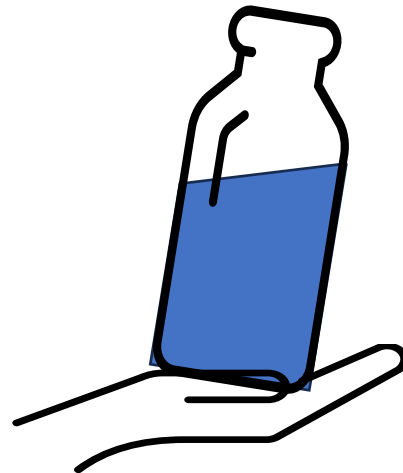

- Our feeling
  - Sad/heartbroken
  - We want our family to stay safe and healthy
  - How we prepare for disasters

# Harmful rumors

## Some people think

- Radiation is bad
- ALPS water is Not safe  
→ Impact on fishing industry

## How to avoid

- Use social media
- Promotion / advertisement
- Gain trust by different explanation
- Science education
- Proper research

How did our  
opinion change ?  
What should we  
do next ?

At first

Our family and friends

- Uncertain and afraid
- Proud and jealous
- Less knowledge

What should we do?

- Share concrete information in details
- Share real experience more than news

To whom :

- Younger generation, Futaba citizens, Leaders,
- home country, people who almost forgot about the disasters

A life-time experience and memories that we won't forget!
