- 3 Period of research:
09/2019~03/2021
- 4 Main location of collaboration implementation:
RCNP, Osaka University
- 5 Publication list:
No publications and talks.
- 6 Description of the results and outputs
By using the constructed microscopic cluster wave functions (the THSR wave function) and three-body interactions, we have got some preliminary results for the 5α calculations. The most difficult and important part has been done. Next, we will perform GCM calculations and search for the 5α condensate state in ^{20}Ne .
