3. Period of workshop / conference	from 14/03/2023 to 16/03/2023
4. Venue	J-PARC
5. Description of the results	<p>A series of workshops has been held to discuss and deepen physics at the J-PARC Hadron Experimental Facility since the beginning of J-PARC. In the 3rd workshop, discussions were continuously devoted to the physics case connecting both the "present" and the "future" Hadron Experimental Facility of the J-PARC. For that purpose, this workshop will cover wide-ranging topics in flavor, hadron, and nuclear physics related to both experimental and theoretical activities being conducted at the Hadron Experimental Facility as follows:</p> <ul style="list-style-type: none"> • S=-1 and -2 hypernuclei • baryon-baryon and meson-baryon interactions • meson in nuclei • baryon spectroscopy • kaon rare decays • mu-e conversion • future facilities and instrumentation <p>The workshop was held in a hybrid format. A total of 188 participants from 17 countries attended the workshop, including 59 from foreign institutions. About 60, including 10 from overseas, were local participants. The scientific program comprised plenary sessions by invited speakers and parallel sessions by invited and contributed speakers. There were 14 plenary talks and 69 parallel talks.</p>
