

Editor's Postscript

In 2004, we undertook major revisions of our safety guidebook with the start of RCNP administration of safety and hygiene. We took various measures related to safety and hygiene in cooperation with joint use researchers this year. On the basis of the accumulated experience that resulted from those processes and the various opinions heard, we have edited and updated the guidebook for safety .

As for safety and hygiene management, the cooperation of the staff and joint use researchers is necessary. We will make an effort to maintain safety in order to prevent an accident at work. We ask for your continued cooperation in this matter.

We would like to express our appreciation to Takeshi Nomoto (office manager), Tadao Okayasu (ex-chief general affairs section) and Arisa Nakanishi (ex-secretary) for their cooperation in making and editing this guidebook. We are deeply grateful to all of them.
