5. Description of the results in 100-200 words	Around 100 participants from universities, research institutions and companies in Japan and overseas attended the 11th 'Low Background Technologies' symposium and the 2nd 'Underground Rare Events' workshop for young researchers. The events featured lively discussions and fostered exchanges that transcended generational and disciplinary boundaries. There was once again a large turnout of young researchers, likely due to the supportive environment, which included subsidies for travel expenses, thus making participation more accessible.
