# Correlation function and hadron interaction

High-energy collision: chaotic source  $S(r)$  of hadron emission

## - Definition

$$C(q) = \frac{N_{K^-p}(p_{K^-}, p_p)}{N_{K^-}(p_{K^-})N_p(p_p)} \quad (= 1 \text{ in the absence of FSI})$$

## - Theory (Koonin-Pratt formula)

$$C(q) \simeq \int d^3r \, S(r) |\Psi_q^{(-)}(r)|^2$$

Source function  $\longleftrightarrow$  two-body wave function (FSI)

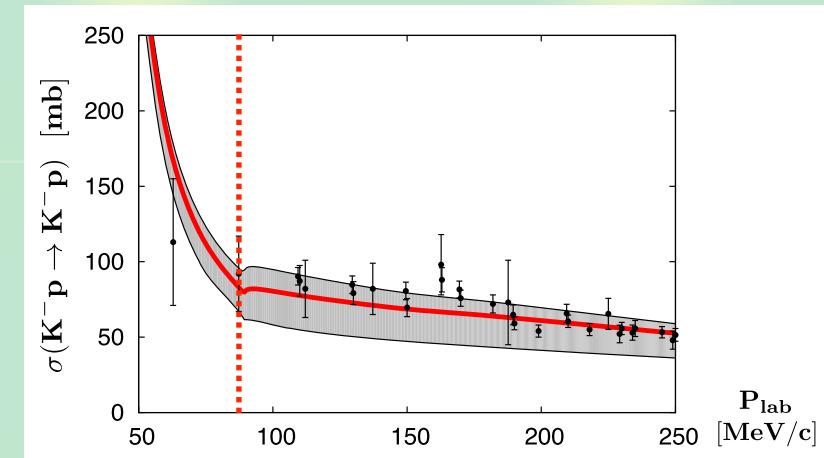

ALICE collaboration, Nature 588, 232 (2020); ...

# Experimental data of $K^-p$ correlation

## $K^-p$ total cross sections

Y. Ikeda, T. Hyodo, W. Weise, PLB 706, 63 (2011)

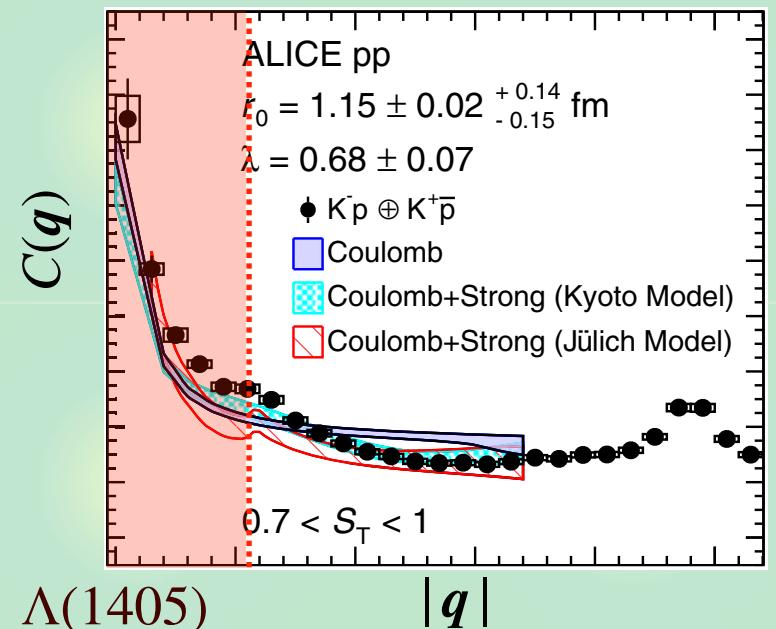

- Old bubble chamber data
- Resolution is not good
- Threshold cusp is not visible

## $K^-p$ correlation function

ALICE collaboration, PRL 124, 092301 (2020)

- Excellent precision ( $\bar{K}^0 n$  cusp)
- Low-energy data below  $\bar{K}^0 n$

→ Important constraint on  $\bar{K}N$  and  $\Lambda(1405)$

# Coupled-channel correlation function

## Schrödinger equation (s-wave)

$$\begin{pmatrix} -\frac{\nabla^2}{2\mu_1} + V_{11}(r) + V_C(r) & V_{12}(r) & \dots \\ V_{21}(r) & -\frac{\nabla^2}{2\mu_2} + V_{22}(r) + \Delta_2 & \dots \\ \vdots & \vdots & \ddots \end{pmatrix} \begin{pmatrix} \psi_{K^-p}(r) \\ \psi_{\bar{K}^0 n}(r) \\ \vdots \end{pmatrix} = E \begin{pmatrix} \psi_{K^-p}(r) \\ \psi_{\bar{K}^0 n}(r) \\ \vdots \end{pmatrix}$$

**Coulomb**

**threshold energy difference**

## Coupled-channel formulation

R. Lednicky, V.V. Lyuboshitz, V.L. Lyuboshitz, Phys. Atom. Nucl. 61, 2050 (1997);  
J. Haidenbauer, NPA 981, 1 (2019)

$$C_{K^-p}(\mathbf{q}) \simeq \int d^3\mathbf{r} S_{K^-p}(\mathbf{r}) |\Psi_{K^-p, \mathbf{q}}^{(-)}(\mathbf{r})|^2 + \sum_{i \neq K^-p} \omega_i \int d^3\mathbf{r} S_i(\mathbf{r}) |\Psi_{i, \mathbf{q}}^{(-)}(\mathbf{r})|^2$$

- **Transition from**  $\bar{K}^0 n, \pi^+ \Sigma^-, \pi^0 \Sigma^0, \pi^- \Sigma^+, \pi^0 \Lambda$
- $\omega_i$  : **weight of source channel  $i$  relative to  $K^-p$**

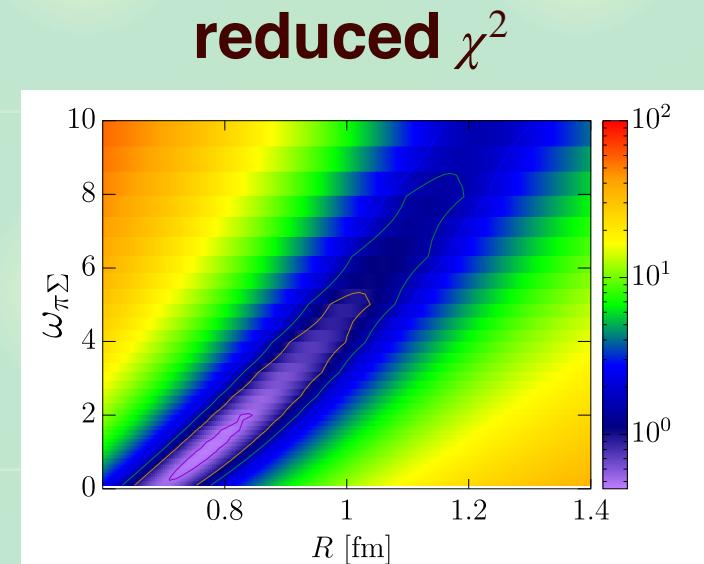

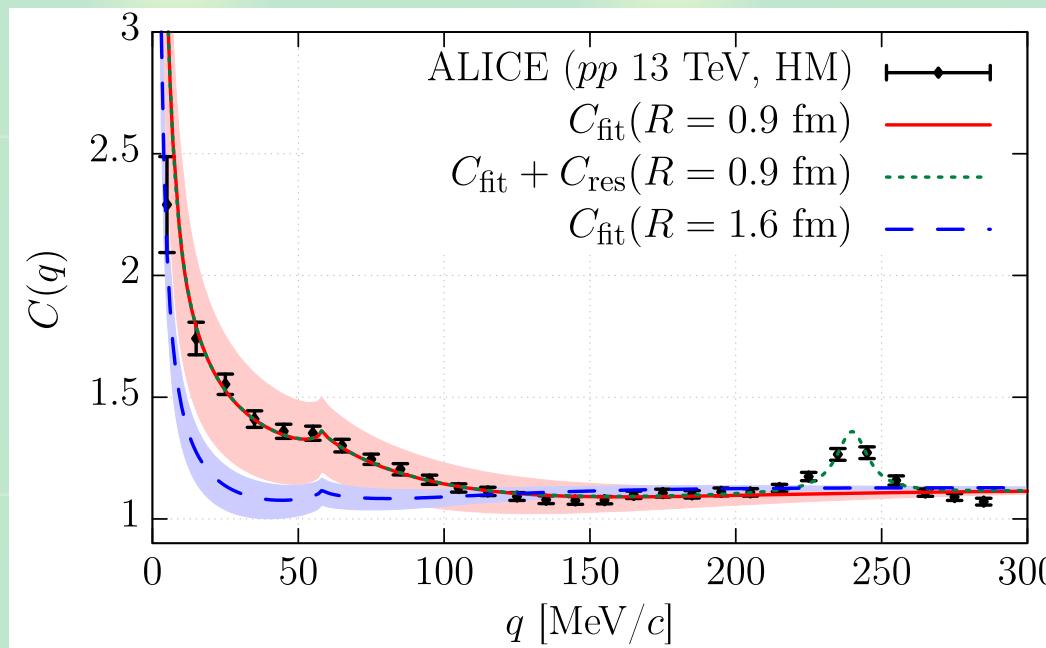

# Correlation from chiral SU(3) dynamics

**Wave function  $\Psi_q^{(-)}(r)$  : coupled-channel  $\bar{K}N$ - $\pi\Sigma$ - $\pi\Lambda$  potential**

K. Miyahara, T. Hyodo, W. Weise. PRC98, 025201 (2018)

**Source function  $S(r)$  : Gaussian,  $R \sim 1$  fm in  $K^+p$  data**

**Source weight  $\omega_{\pi\Sigma} \sim 2$  by simple statistical model estimate**

Y. Kamiya, T. Hyodo, K. Morita, A. Ohnishi, W. Weise. PRL124, 132501 (2020)

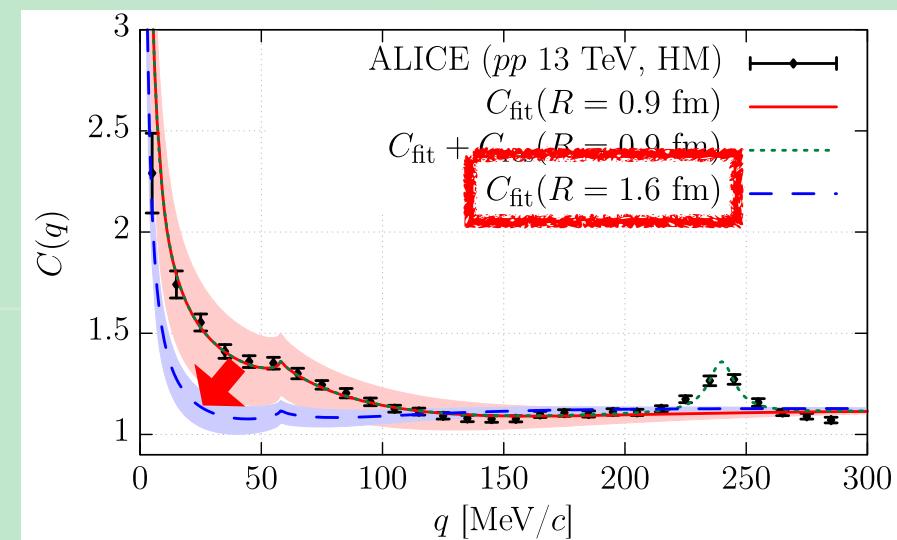

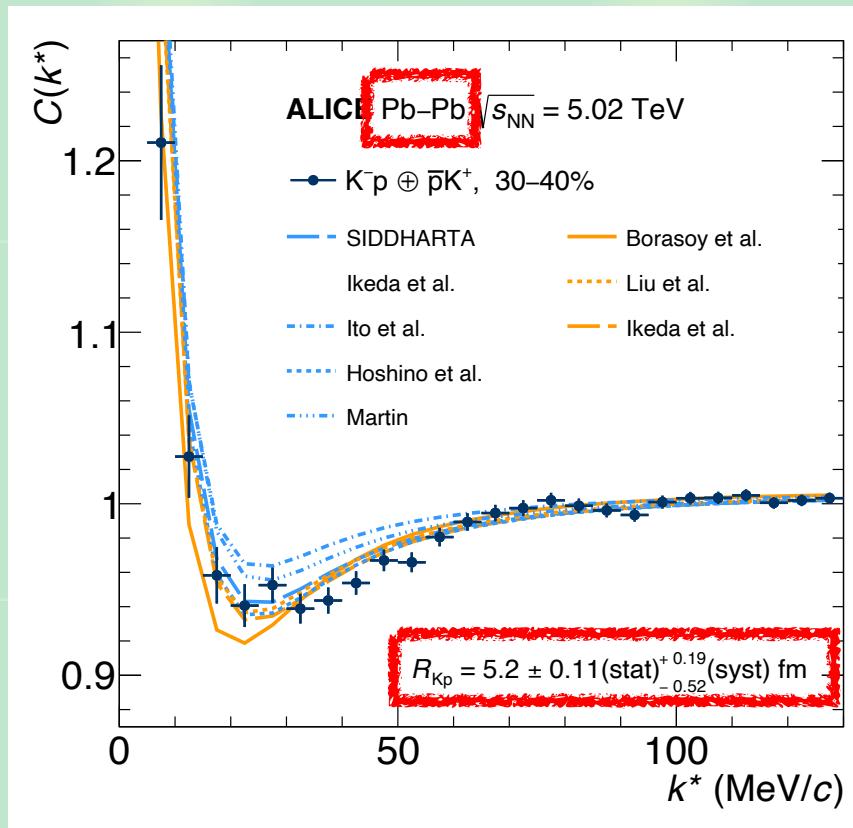

**Correlation function by ALICE is well reproduced**

# Source size dependence

## New data of Pb-Pb collisions at 5.02 TeV

ALICE collaboration, arXiv:2105.05683 [nucl-ex]

- Scattering length  $a_{K^-p} = -0.91 + 0.92i$  fm

Correlation is suppressed at larger  $R$ , as predicted

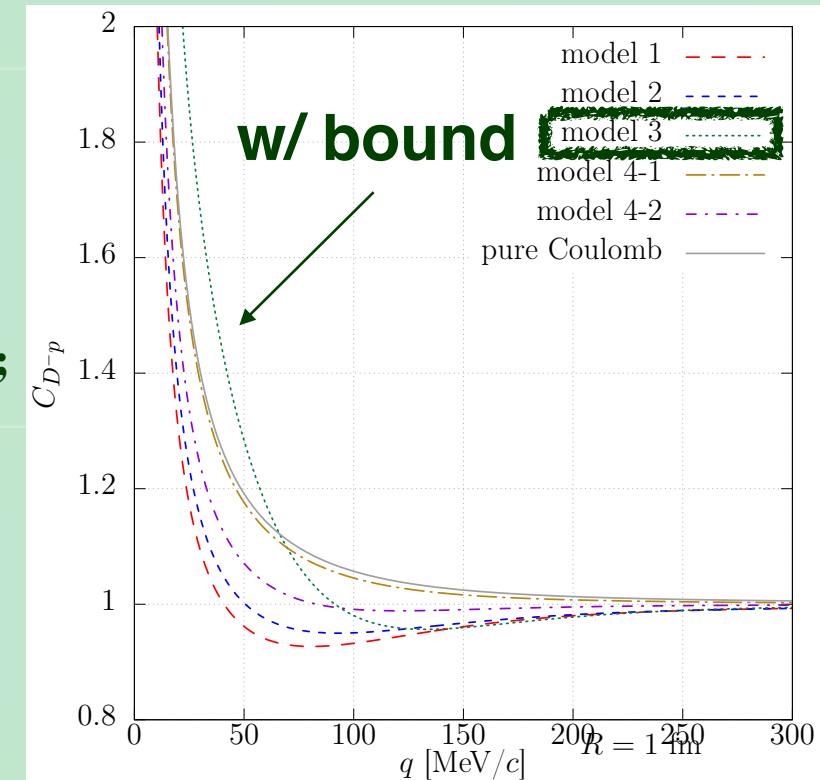

# Exotic charm sector

$D^- p$  correlation functions ( $\bar{c}duud$ , exotic channel)

- Coupled with  $\bar{D}^0 n$
- No decay channels below
- Theoretical models

- [1] J. Hofmann, M.F.M. Lutz, NPA763, 90 (2005);
- [2] J. Haidenbauer *et al.*, EPJA33, 107 (2007);
- [3] Y. Yamaguchi *et al.*, PRD84, 014032 (2011);
- [4] C. Fontoura *et al.*, PRD87, 025206 (2013)

- Effective potentials  $\leftarrow a_0 (I = 0, 1)$

- Model 3 with a **bound state** : dip structure
- To be compared with experiments in future

Y. Kamiya, T. Hyodo, A. Ohnishi, in preparation

# Non-exotic charm sector

$D^+ p$  correlation functions ( $c\bar{d}uud$ , non-exotic channel)

- No isospin partner in  $DN$
- With decay channels ( $\pi\Lambda_c, \pi\Sigma_c$ )
- Theoretical models

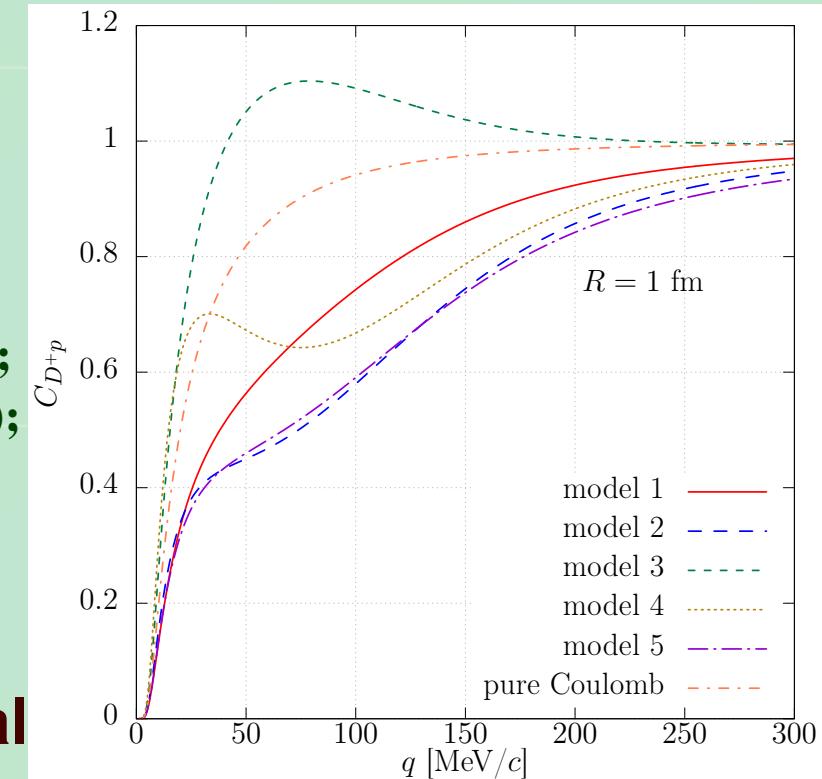

- [1] J. Hofmann, M.F.M. Lutz, NPA763, 90 (2005);
- [2] T. Mizutani, A. Ramos, PRC74, 065201 (2006);
- [3] C. Garcia-Recio *et al.*, PRD79, 054004 (2009);
- [4] J. Haidenbauer *et al.*, EPJA47, 18 (2011);
- [5] U. Raha *et al.*, PRC98, 034002 (2018)

- Effective single-channel potential

$\leftarrow a_0(I = 1)$

- Sizable dependence on the scattering length

Y. Kamiya, T. Hyodo, A. Ohnishi, in preparation

# Summary

- Correlation functions are useful to study hadron interactions.
- $K^-p$  correlation in  $pp$  collisions can be well described by chiral SU(3) dynamics. Source size dependence will be further studied.
- $D^-p$  and  $D^+p$  correlations are predicted based on scattering lengths in various models. Measurements will give first experimental information in these sectors.

[Y. Kamiya, T. Hyodo, A. Ohnishi, in preparation](#)
