

## 2c. 補足

# $U_p + U_n$ の畳み込みで $d$ の弾性散乱は描けるか?

# スピン偏極量の研究例

M. Yahiro, Iseri, Kameyama, Kamimura, and Kawai, PTP Suppl. **89**, 32 (1986).

# Effects of tensor interaction in p-n breakup states on deuteron elastic scattering

Y. Iseri <sup>a</sup>, M. Tanifuchi <sup>b</sup>, Y. Aoki <sup>c</sup> and M. Kawai <sup>d</sup>

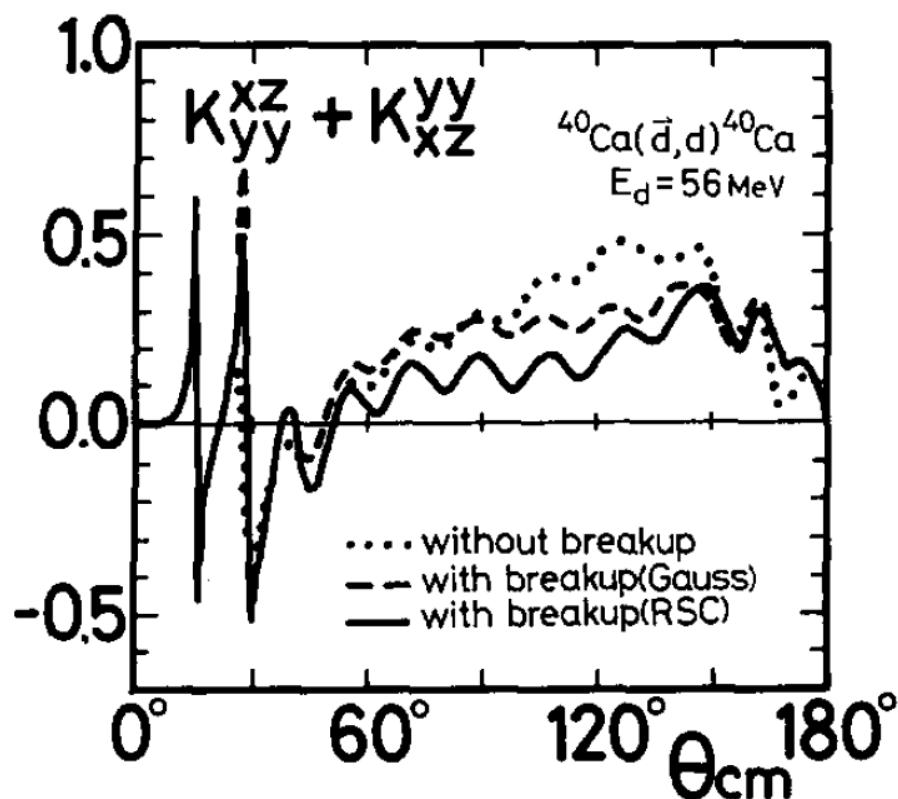

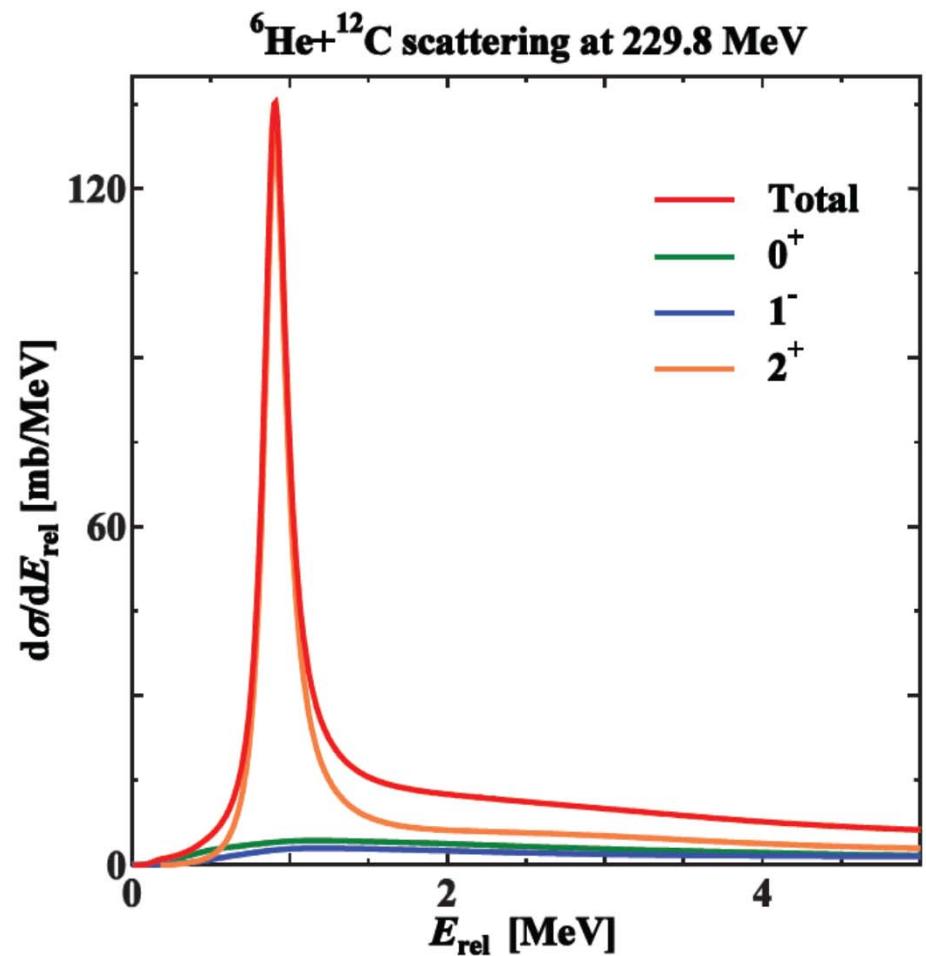

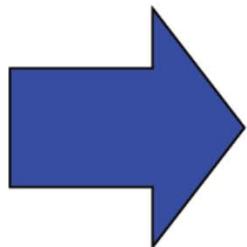

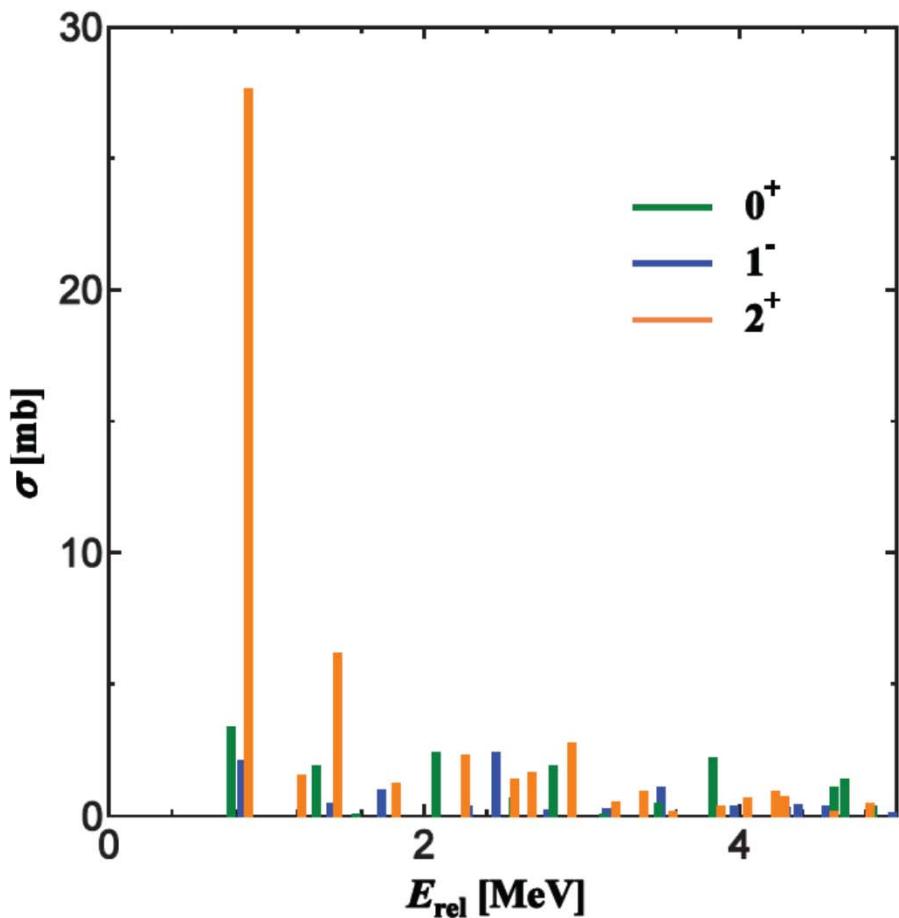

Fig. 3. The linear combination of polarization transfer coefficients  $K_{yy}^{xz} + K_{yy}^{xz}$  in  ${}^{40}\text{Ca}(\vec{d}, d){}^{40}\text{Ca}$  at  $E_d = 56 \text{ MeV}$ . The definitions of the lines are the same as in fig. 2.
